**DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE**

This is now a three story brick detached corner building four bays wide and two narrow bays deep with an "L" shaped brick, two story wing, two narrow bays wide and three bays long with a side balcony. This was originally a 2-1/2 story building according to sidewall evidence, but a mansard roof was added to the front and the rear section extended out to form a third floor. The first floor has various newer extensions behind the left bays shop area. Front brickwork is laid in Flemish bond and other walls are in common bond. This building was designed as a merchant's shop on the left side and his home on the right side (with the wing). The left bays contain a large paned shop window and door framed as a unit by fluted pilasters and a simple moulded cornice with dentil trim and supported on the ends by scrolled brackets. This window is flush with the wall and is about 3' above the pavement level. The narrow residential doorway lies on the third bay from the left and now has a newer door and transom headed by a flat brick arch as over the adjoining 1/1 sash window. Upper story front windows are now all of 1/1 sash with wood lintels and sills. The mansard area contains two peaked dormers on the front. Rear area windows are of 6/6 sash with wood lintels and sills. A rear door is of glass over panels. The front mansard is covered by rectangular tiles with a decorative band of hexagon tiles across the center. The remaining roof slopes to the rear and the wing has a steep shed roof--both of metal. The mansard is supported by the original three string brick cornice. An enclosed chimney rises from the center of the left wall. The building rests on a low foundation.

SPECIFIC DATES

BUILDER/ARCHITECT

STATEMENT OF SIGNIFICANCE

This building has very little Federal identity left because of such vast renovations over the years; however, it does stabilize the corner intersection.
